NEW IVF SHARED RISK PROGRAM WITH 100% REFUND

Costs can sometimes be an obstacle when considering advanced fertility therapies. As part of our commitment to help more patients achieve their dream of parenthood and because of our continued confidence in the quality of our services, a new financial option for qualifying couples undergoing IVF provides a full refund (100%) if a baby is not born after completing up to 6 IVF attempts (up to 3 fresh and 3 cryopreserved treatment cycles). Women up to 40 years of age may qualify for this program. For women under 35 years of age who may qualify for this option, a rate as low as \$18,000.00 provides enrollment into this program.

PGD EMBRYO SCREENING AVAILABLE

In couples undergoing in vitro fertilization, Pre-Implantation Genetic Diagnosis (PGD) allows chromosomal analysis of the early embryo. Pregnancies established following the replacement of normal PGD embryos have a significantly reduced risk of miscarriage and of numerical chromosome anomalies. Since 2002 we have offered PGD to couples with advancing maternal age (≥ 35), history of repeated miscarriages, prior pregnancy with a chromosomal abnormality and history of repeated failed IVF attempts.

FAMILY BALANCING: Girl or Boy?

Sometimes nature can use a little assistance. Sperm separation technology and PGD embryo screening technology can assist in achieving a balanced family. For over 3 years now, our team has helped many couples conceive children of the less represented sex in their family. For additional information on family balancing procedures please contact our offices.

OUR CENTER OFFERS EARLY PREGNANCY SCREENING

Any pregnant woman who is interested in screening her pregnancy for conditions such as Down Syndrome and Trisomy 18 can request our expert ultrasound nuchal translucency (NT) measurement and blood screening tests. In addition, we also provide chorionic villi sampling (CVS) and amniocentesis for definitive diagnosis of these and other genetic conditions.

NEW SATELLITE OFFICE SERVING WEST FLORIDA

Patients from the west coast (Sarasota, Naples, Ft Myers and Marco Island) can now easily access our satellite office located at 1890 SW Health Parkway 2nd Floor, Naples, FL, 34109. In collaboration with the physicians of *Especialty for Women* the west coast satellite offers complete male and female fertility diagnostic services for couples seeking advanced fertility treatments. For additional information please call toll free 1-866-246-2273 or visit our website at www.care-life.com.

FREE EDUCATIONAL SEMINAR ON SATURDAY JAN. 21ST

Our free patient educational seminar has been scheduled for 10:00 am on January 21st, 2006 at our main facility located at 201 North Pine Island Road in Plantation. In an informal setting, couples will have an opportunity to learn about the latest advances and success rates of various fertility therapies. For directions and to RSVP please contact our offices by January 18th at 1-866-246-CARE, or via e-mail at info@care-life.com. SPACE IS LIMITED. All pre-registered attending couples are eligible for a free consult within 45 days.

CLINICAL IVF TRIALS FOR QUALIFIED CANDIDATES (2006)

We anticipate to begin new IVF-related clinical studies which will encompass advances in cutting edge technology, such as egg freezing, improvements in embryo culture and screening for chromosomal anomalies. For additional information please contact our offices.
